EXPERIENCE

Financial Analyst
Life Care International Insurance Brokers

January 2024 Current, Nairobi

Achievements

- Enhanced Reporting Efficiency:** Implemented Power BI integration with QuickBooks, streamlining monthly financial reporting and enabling timely, insight-driven decision-making.
- Cross-Departmental Alignment:** Aligned finance and commercial figures, reducing data discrepancies by over 90%, fostering consistency and trust in shared reports.
- Advanced Strategic Insights:** Spearheaded the adoption of Fathom as a financial reporting tool, empowering top management with detailed dashboards, scenario analysis, and accurate forecasting for better strategic decisions.

Responsibilities

- Cleaned and organized financial and operational data, ensuring accuracy and reliability for decision-making.
- Prepared and presented management reports to leadership, providing insights that supported strategic planning.
- Performed bank reconciliations to maintain accurate cash positions and support timely financial reporting.
- Coordinated audit preparations, ensuring compliance with statutory and internal requirements.
- Developed and maintained cashflow reports, enabling effective liquidity and working capital management.
- Utilized Fathom reporting tools to deliver interactive dashboards and performance reports for management.
- Produced financial forecasts and projections, supporting budgeting and long-term planning.
- Created data visualizations using Power BI and Excel to simplify complex financial data for stakeholders.
- Implemented IFRS 16 lease accounting standards, ensuring compliance with reporting requirements.
- Streamlined reporting processes between the commercial and finance teams, improving accuracy and efficiency of financial data.

Data Analyst | Administrative Assistant
Mombasa Total Solutions Limited

July 2022 – December 2023,

Achievements

- Elevated Data Precision:** Orchestrated initiatives that significantly improved data accuracy, reducing errors by 15% and inconsistencies by 20%, ultimately heightening the reliability of reports and decision-making.
- Streamlined Data Analysis with Excel:** Implemented advanced Excel functions, including pivot tables, and developed custom templates to expedite data analysis, resulting in quicker insights, reporting, and a 20% reduction in manual effort.
- Reporting Accuracy and Problem-Solving:** Resolved data discrepancies in financial reports, ensuring compliance and precision, while implementing checks that reduced errors by 15% and boosted stakeholder trust in insights.

Responsibilities

- Extracted, transformed, and loaded data into a centralized database using SQL, ensuring real-time access to critical sales data.
- Utilized Excel and advanced functions for data analysis, providing critical insights and supporting informed decision making.
- Developed and maintained data pipelines, ensuring seamless integration of tech data for analysis and data scraping.
- Performed statistical analysis on tech data to provide data-driven insights that influenced tech strategies and product development.
- Created insightful data visualizations and reports using Tableau, translating complex tech data into actionable insights for tech decision-makers.
- Provided top-notch customer service by promptly addressing tech-related inquiries, resolving technical issues, and assisting with software tool usage.
- Prepared and edited documents, reports, and presentations using Microsoft Office Suite, with a focus on technical content and clarity.
- Collaborated with the sales and IT teams to integrate data from the CRM system, e-commerce platform, and inventory database.

Financial Analyst

V.K. Hirani Suppliers

Feb 2017 – 2021, Mombasa

Achievements

Cost Allocation Accuracy: Introduced an automated cost allocation system, ensuring precise cost attribution to different departments, resulting in more informed budget decisions and resource allocation.

Reduction in Manual Reconciliation: Reduced manual reconciliation efforts by 80% through the implementation of automated reconciliation software, ensuring accuracy and faster financial close processes.

Vendor Payment Efficiency: Automated vendor payment scheduling and invoice processing, resulting in a 40% reduction in late payment penalties and improved vendor relationships.

Streamlined Budgeting Process: Automated the budgeting and forecasting process, reducing the time required to create annual budgets by 50% and improving the accuracy of financial projections.

Responsibilities

- Prepare, examine, and assess financial statements, encompassing income statements, balance sheets, and cash flow statements.
- Develop annual budgets and financial forecasts by leveraging historical data, monitoring market trends, and aligning with company objectives.
- Construct and maintain intricate financial models to aid strategic decision-making, which includes valuations, scenario analysis, and risk assessments.
- Utilize Tableau for crafting visual reports that facilitate performance comparisons between actual results and budgeted targets.
- Evaluate financial modules for functionality, compliance, and precision.
- Collaborate closely with teams during ERP system implementations, ensuring that financial modules align seamlessly with business objectives.
- Coordinate and provide support for both internal and external audits to ensure timely completion.
- Maintain ongoing tax compliance to uphold the organization's adherence to tax regulations.
- Monitor cash flows, ensuring the organization has adequate liquidity to meet its financial obligations.
- Conducted in-depth profitability analysis for an underperforming product line, investigating the root causes of underperformance and identifying key cost drivers.

PROJECTS

Coffee Sales Analysis | *Advanced Excel, VLOOKUP, Git*

Project

- Utilized historical data from 2019 to 2022 to analyse coffee sales trends over time.
- Demonstrated proficiency in data manipulation and analysis tools, including Excel functions, pivot tables, and charting.
- Identified and ranked the top 5 customers based on their purchase amounts using pivot tables.
- Generated detailed reports showcasing coffee sales trends across multiple countries, including the United States, Ireland, and the United Kingdom.

Sales Analysis | *Advanced Excel, VLOOKUP, Excel Add-ins, Power query, Git*

Project

- Cleaned and transformed raw sales data for analysis.
- Utilized Excel functions (e.g., VLOOKUP, SUMIFS, Index & Match) for data aggregation.
- Applied a wide range of advanced Excel functions, including VLOOKUP, SUMIFS, INDEX-MATCH, and array formulas, to aggregate and manipulate data.

Auto Inland Claim Insurance Analysis | *Python, Pandas, Git*

Project

Women in Data, Nairobi Chapter in partnership with Zindi and IBM Research Africa Datathon

- Collaborated with two colleagues to develop a robust machine learning model using XGBoost and LightGBM.
- The model accurately predicted whether customers would submit insurance claims within the next three months.
- Demonstrated exceptional teamwork and technical proficiency, leading the team to victory in the project.

Financial Inclusion | *Python, Pandas, Neural Net, Git*

Project

- Conducted thorough exploratory data analysis to gain insights and understanding of the dataset.
- Addressed missing values by sorting and managing null values effectively.
- Split the dataset into training and testing sets for model evaluation.
- Performed data normalization to ensure that all variables had the same scale.
- Addressed class imbalance in the dataset using SMOTE.

The primary goal of the project was to predict the likelihood of individuals having or using bank accounts.
